

**American College of Preventive Medicine
Public Health and General Preventive Medicine
Standard Privileges**

Requesting Physician:	Current Board Certification(s): ABPM Board (Expiration Date) ABPM Board (Expiration Date)
Dates Privileges in Effect: mm/dd/yyyy -- mm/dd/yyyy	
Privilege Request Codes: 1: Fully qualified to perform 2: Supervision required to perform 3: Not qualified to perform	Current Active License(s): State (Expiration Date) State (Expiration Date) State (Expiration Date)

NOTE: Clinical direct-patient-care privileges commensurate with physician’s clinical training and expertise may be requested and approved on a separate document.

Preventive Medicine Competency Area: Core Competencies		
<i>Requested</i>	<i>Decision</i>	<i>Preventive Medicine Competency</i>
		Monitor health status to identify population health problems
		Diagnose and investigate medical problems and medical hazards in an identified population
		Inform and educate populations about health threats and risks
		Mobilize partnerships to identify and solve health problems
		Develop policies and plans to support individual and population health efforts
		Apply laws and regulations that protect health and ensure safety of populations
		Link individuals to necessary health services and ensure the provision of health care when otherwise unavailable
		Evaluate the effectiveness, accessibility, and quality of individual and population-based health services
		Conduct research for innovative solutions to health problems

Preventive Medicine Competency Area: Clinical Preventive Medicine		
<i>Requested</i>	<i>Decision</i>	<i>Preventive Medicine Competency</i>
		Apply primary, secondary, and tertiary preventive approaches to individual and population-based disease prevention and health promotion systems
		Develop, implement and evaluate a health system’s method of providing appropriate clinical preventive services for both individuals and populations
		Select appropriate, evidence-based, clinical preventive services for individuals and populations
		Analyze evidence regarding the performance of proposed clinical preventive services for individuals and populations

		Manage and administer programs that provide recommended clinical preventive care (including immunizations, chemoprophylaxis and screening tests) to individuals and populations
		Counsel individuals and populations regarding the appropriate use of clinical preventive services

Preventive Medicine Competency Area: Public Health Practice		
<i>Requested</i>	<i>Decision</i>	<i>Preventive Medicine Competency</i>
		Investigate a disease outbreak, while assessing the medical needs of both individual patients and populations
		Implement programs to reduce the exposure to risk factors for an illness or condition in a population
		Conduct policy analyses to improve the health of a population
		Design, operate, and evaluate a surveillance system
		Conduct program and needs assessments, and prioritize activities using objective, measurable criteria, including epidemiologic impact and cost-effectiveness
		Identify and review laws and regulations relevant to the physician's specialty area and assignments
		Identify organizational decision-making structures, stakeholders, styles, and processes
		Assess program and population resources, develop a plan for appropriate resources, and integrate resources for program implementation
		Assess organizational performance against stated goals
		Analyze policy options for their health impact and economic costs
		Evaluate applicants and the performance of staff, and understand the legal and ethical use of this information in decisions for hiring, managing, and discharging staff
		Systematically analyze health systems using quality improvement methods, and implement changes with the goal of system improvement
		Locate, appraise, and assimilate evidence from scientific studies related to population health and health system issues
		Participate in the education of patients, families, students, residents and other health professionals
		Use electronic devices and analytic software for reference retrieval, statistical analysis, graphic display, database management, and communication
		Use appropriate epidemiology principles and biostatistics methods to characterize the health of a population
		Design and conduct an epidemiologic study
		Design and conduct a virtual or actual outbreak or cluster investigation
		Translate epidemiologic findings into a recommendation for a specific intervention
		Measure, organize, or improve public health care
		Conduct an advanced literature search for research on a preventive medicine topic
		Communicate on behalf of health system with patients, families, health professionals and the public, as appropriate
		Manage health and provide health care for a defined population

Preventive Medicine Competency Area: Occupational and Environmental Health		
<i>Requested</i>	<i>Decision</i>	<i>Preventive Medicine Competency</i>
		Assess and respond to individual and population risks for common occupational and environmental disorders

Preventive Medicine Competency Area: Management and Administration		
<i>Requested</i>	<i>Decision</i>	<i>Preventive Medicine Competency</i>
		Assess data and formulate policy for a given health issue
		Develop and implement a plan to address a specific health problem
		Conduct an evaluation or quality assessment based on process and outcome performance measures
		Manage the human and financial resources for the operation of a program or project
		Apply and use management information systems
		Plan, manage, and evaluate population health services to improve the health of a defined population using quality improvement and assurance methods

Preventive Medicine Competency Area: Emergency Preparedness		
<i>Requested</i>	<i>Decision</i>	<i>Preventive Medicine Competency</i>
		Determine the nature and extent of injuries sustained and need for subsequent treatment
		Plan emergency preparedness programs and training exercises
		Evaluate emergency preparedness training exercises to ensure the health and safety of those involved

NOTE: Clinical direct-patient-care privileges commensurate with physician’s clinical training and expertise may be requested and approved on a separate document.
