

As part of the American College of Preventive Medicine’s This is Preventive Medicine campaign, we encourage members to join the conversation and share important medical student-focused messages with their community and followers. By leveraging your Facebook, LinkedIn, Instagram, and Twitter channels, you have the power to highlight and make medical students aware of the opportunities that exist for them with a career in Preventive Medicine. These posts will help to generate conversation, spread awareness, and educate medical students on the Preventive Medicine profession.

The following are recommended postings. Please feel free to adapt and customize the content below as appropriate to reflect your views and experiences.
